

OSFI Guideline B-20 Disclosure relating to the Residential Mortgage Portfolio

Definition of insured and uninsured residential mortgage

An insured residential mortgage may be defined as a mortgage that carries an insurance policy that would protect a lender and/or title holder in the event that the borrower defaults on payments, dies, or is unable to meet the contractual obligations of the mortgage. A mortgage loan that does not carry appropriate mortgage insurance is deemed to be uninsured.

- Mortgage loan insurance is required by lenders when homebuyers make a down payment of less than 20% of the purchase price. Mortgage loan insurance helps protect lenders against mortgage default, and enables consumers to purchase homes with a minimum down payment of 5%. Mortgage default insurance is not available for homes with a purchase price of a million dollars or more and/or an amortization of greater than 25 years.
- The homebuyer is not required to take out mortgage insurance if he or she is providing a down payment of greater than or equal to 20%.
